

Detailed Everest Mountain Overfly with Gokyo Lake Landing Itinerary

Flight Request and Confirmation

Share your preferred travel date, the number of passengers, exact passenger weights, and baggage details with Mountain Helicopters Nepal. Our operations team will verify helicopter availability, weather conditions, airport status, and total payload to ensure the flight can be operated safely. Once everything is confirmed, you will receive your final itinerary, reporting time, meeting point, and baggage allowance, so you can prepare for a smooth and hassle-free journey.

Safety briefing and boarding

Before boarding, the crew briefs passengers on seating, restraint belts, communication signals, and in-flight procedures. If the total weight exceeds the allowed limit, some baggage will need to be stored or sent on the next helicopter flight, and an extra charge will apply.

Flight from Kathmandu to Lukla

The helicopter flies from Kathmandu to the east across hills, farmland, and river valleys to Lukla, where it makes a brief stop to refuel.

Flight to the Khumbu region

After refueling, the helicopter heads into the Khumbu region, passing over or near Lukla, Namche Bazaar, and Tengboche Monastery before climbing toward the high valleys of the Everest region. As the aircraft gains altitude, forested valleys give way to alpine ridges, glacial streams, and the first views of the surrounding Himalayan peaks.

Everest Mountain Overfly and Gokyo Lake Landing

The helicopter completes a close overfly of the Everest Base Camp and Kala Patthar area, revealing the Khumbu Icefall and the summits of Everest, Lhotse, and Nuptse. It then continues

to Gokyo for a 5–10 minute landing beside the turquoise lake, surrounded by the Ngozumpa Glacier and towering peaks, before returning along the confirmed route.

Return flight to Kathmandu

After the journey, the helicopter departs and heads directly back toward Kathmandu, with a brief refueling stop at Lukla along the way.
